# Journeyman

a philosophy of craftsmanship

A Norwegian sled becomes our guide through the philosophical teachings of craftsmanship. Rooted in a true story, the making of this handmade companion reveals the depth of creation and invites us to see the world anew.

This book traces a path back to our inner compass—toward the things we shape, the stories they carry, and the connections that bind us. It is a call to feel, to remember, and to rediscover who we are in this world.
